

19th Session of the Commission on Phytosanitary Measures

#Planthealth for food security, environmental protection
and safe trade

CPM
19

Outline of the Systems Approach Workshop

Diego Quiroga - Argentina NPPO & Bureau member

Importance of systems approaches and how their implementation is connected to the IPPC 2020-2030 Strategic Framework and One Health

Adopted ISPMs related to Systems Approach (SA):

- 14** - The use of integrated measures in a systems approach for pest risk management
- 24** - Guidelines for the determination and recognition of equivalence of phytosanitary measures
- 34** - Design and operation of post-entry quarantine stations for plants
- 35** - Systems approach for pest risk management of fruit flies (Tephritidae)
- 46** - Commodity-specific standards for phytosanitary measures

Draft ISPMs for adoption at CPM-19:

Annex to ISPM 46 (*Commodity-specific standards for phytosanitary measures*):
International movement of fresh
Mangifera indica fruit

Annex to ISPM 39 (*International movement of wood*): Use of systems approaches in managing the pest risk associated with the movement of wood

Draft ISPMs under development:

Annex to ISPM 38 (*International movement of seeds*): Design and use of systems approaches for phytosanitary certification of seeds

High relevance: SA as an option for pest risk management

2020-2030 Strategic Framework: key result area A4

2020-2030 Strategic Framework: Protect the environment from the impacts of plant pests

SAs: an opportunity under the One Health approach

IPPC Strategic Framework 2020-2030:

Insights of the planned IPPC systems approach workshop for 2025 or 2026

- Increase the implementation by countries
- Identification of constraints to recognize and accept SAs
- Disseminate IPPC implementation materials and tools
