

Draft ISPM: Amendments to ISPM 5 (Glossary of phytosanitary terms) (1994-001)

IPPC Member Consultation

1 July to 1 December

2013

Background

These amendments include some additions, some revisions, some deletions and a short note on the understanding of the term “Plants” in the IPPC and its ISPMs.

Additions

- The additions are:
 - exclusion
 - production site

Revisions

- The revisions are:
 - point of entry
 - systems approach(s)
 - suppression, eradication, containment, control
 - place of production and pest free production site
 - quarantine station
 - area of low pest prevalence, commodity pest list, habitat, pest free area, pest free place of production, pest free production site, surveillance, survey

Deletions

- occurrence
- organism, naturally occurring
- restriction
- protected area, controlled area
- contaminating pest

The understanding of the term “Plants” in the IPPC and its ISPMs and the consequential revision of the scope of ISPM 5

- **Scope**

This reference standard is a listing of terms and definitions with specific meaning for phytosanitary systems worldwide. It has been developed to provide a harmonized internationally agreed vocabulary associated with the implementation of the International Plant Protection Convention (IPPC) and International Standards for Phytosanitary Measures (ISPMs).

Within the context of the IPPC and its ISPMs, all references to plants should be understood to extend to algae and fungi, consistent with the International Code of Nomenclature for algae, fungi, and plants.
