

DRAFT AMENDMENTS TO ISPM 5

Glossary of phytosanitary terms

IPPC Member Consultation
20 June to 30 September
2011

Background

- This is a collection of terminological additions, revisions and deletions. For the background for each term see the consultation document.
- The Technical Panel for the Glossary drafted these amendments in October 2010
- SC reviewed: May 2011
- SC approved for Member Consultation: May 2011

General Considerations

- The Glossary is usually updated every year – depending on whether the IPPC has enough money for a meeting of the TPG (not this year) and whether the Standards Committee agrees with the recommendations of the TPG.
- This year there is an eclectic collection of two additions, four revised terms and ten deletions.

Relevant information

- These terms and the amendments arose from a variety of sources:
 - The Technical Panel for the Glossary
 - The Standards Committee
 - Member Comments
- All have been through the system ... work agreed to by the SC, carried out by the TPG, approved by the SC
