## CRITERIA FOR JUSTIFICATION AND PRIORITIZATION OF PROPOSED TOPICS

Adopted by CPM-10 (2015)<sup>1</sup>

Priority will be given to topics with the largest global impact.

### Core criteria (must provide information)

- (1) Contribution to the purpose of the IPPC as described in article I.1.
- (2) Linkage to IPPC Strategic Objectives (SOs) and Organizational results demonstrated.
- (3) Feasibility of implementation at the global level (includes ease of implementation, technical complexity, capacity of NPPOs to implement, relevance for more than one region).
- (4) Clear identification of the problems that need to be resolved through the development of the standard.
- (5) Availability of, or possibility to collect, information in support of the proposed standard (e.g. scientific, historical, technical information, experience).

# Supporting criteria (provide information as appropriate)

# **Practical**

- (1) Feasibility of adopting the proposed standard within a reasonable time frame.
- (2) Stage of development of the proposed standard (is a standard on the same topic already widely used by NPPOs, RPPOs or a relevant international organization).
- (3) Availability of expertise needed to develop the proposed standard.

#### Economic

- (1) Estimated value of the plants protected.
- (2) Estimated value of trade affected by the proposed standard (e.g. volume of trade, value of trade, the percentage of Gross Domestic Product of this trade) if appropriate.
- (3) Estimated value of new trade opportunities provided by the approval of the proposed standard.
- (4) Potential benefits in terms of pest control or quarantine activities.

# **Environmental**

- (1) Utility to reduce the potential negative environmental consequences of certain phytosanitary measures, for example reduction in global emissions for the protection of the ozone layer.
- (2) Utility in the management of non indigenous species which are pests of plants (such as some invasive alien species).
- (3) Contribution to the protection of the environment, through the protection of wild flora, and their habitats and ecosystems, and of agricultural biodiversity.

## Strategic

(1) Extent of support for the proposed standard (e.g. one or more NPPOs or RPPOs have requested it, or one or more RPPOs have adopted a standard on the same topic).

<sup>1</sup> Initially adopted by CPM-3 (2008) (Paragraph 89.3 and Appendix 8) and revised by CPM-10 (2015) (Paragraph 74 and Appendix 6).

- (2) Frequency with which the issue addressed by the proposed standard emerges as a source of trade disruption (e.g. disputes or need for repeated bilateral discussions, number of times per year trade is disrupted).
- (3) Relevance and utility to developing countries.
- (4) Coverage (application to a wide range of countries/pests/commodities).
- (5) Complements other standards (e.g. potential for the standard to be used as part of a systems approach for one pest, complement treatments for other pests).
- (6) Foundation standards to address fundamental concepts (e.g. treatment efficacy, inspection methodology).
- (7) Expected standard longevity (e.g. future trade needs, suggested use of easily outdated technology or products).
- (8) Urgent need for the standard.
