传统和无人机施药对比，农用无人机经济潜力大，社会价值高

VS. traditional spraying, agricultural UAV brings higher economic and social value

效率高/Efficiency

人工喷洒每天作业约10亩

大疆植保机相同时间作业>500亩
1 vs. 33 ha/day

成本低/Cost

农村植保请人难导致费用高

无人机作业节水、节药
且人力成本仅为传统施药一半
Saves water and pesticides with
50% cost

安全好/Safety

暴露在农药环境中，经常性高温作业
大型机械损伤农作物

人药分离，工作量小

Separate chemical from farmer

应用广/Areas

水田、高杆作物区
效率降低严重

无人机作业地形适应性更高
Can be used on water-based field and high
corps

四年时间，自主创新，两大系列，四款大疆农用无人机 4 DJI agricultural UAVs in 2 product lines

- 2015年, MG-1
- 2016年, MG-1S
- 2017年, MG-1P 及 播撒机
 - 八旋翼, 载重10KG, 90亩/小时
 - Spray & Spread
 - 8 rotors, 10kg payload, 6hc/h
- 2018, T16
 - 六旋翼, 16KG, 150亩/小时
 - 6 rotors, 16kg payload, 10hc/h

Agricultural start up made easier by DJI

王文礼夫妇，黑龙江
三个月作业30,000亩
盈利10+万元

刘杨团队，湖北
年作业近30万亩
2018年公司实现营收300万

张江旭父子，浙江
半年作业14,000亩
半年实现盈利21万

CASE STUDY

PARTNER: Rong Meng Ya

Ms. Rong comes from a farming family. During her education overseas, she realized that there is a big gap in the agricultural mechanization levels of China and the U.K. She joined DJI as a sales associate and also started a crop protection service team, helping farmers in her surrounding area.

End User: Da Wei

Beginning with a single AGRAS drone, Mr. Da offered crop protection services in Heilongjiang, Xinjian, Anhui, and Hainan. With just one drone, he was able to spray 2,000 ha of fields in one year and made a great profit. He has since expanded his business and now operates a team of three drones.

Emergency Crop Protection

In 2017, Ningxia suffered from a devastating outbreak of corn armyworm, affecting 85,000 ha of fields. DJI organized 10 drone crop protection service teams, mobilizing close to 80 drones, and effectively stopping the spread of the worm.
