

REPORT

STRATEGIC PLANNING GROUP (SPG) MEETING

**VIRTUAL MEETING
8-9 OCTOBER 2020**

IPPC SECRETARIAT

CONTENTS

1. Opening of the Meeting	4
2. Meeting Arrangements.....	4
2.1. Adoption of the Agenda	4
2.2. Election of the Rapporteur	5
3. Administrative Matters	5
3.1. Document lists.....	5
3.2. Participants list	5
4. Advancing work on IPPC Development Agendas 2020-2030.....	5
4.1. Commodity - and pathway - specific ISPMs.....	6
4.2. Developing guidance on the use of third-party entities.....	7
4.3. Diagnostic laboratory networking	9
4.4. Harmonization of electronic data exchange	10
4.5. Management of e-commerce and postal and courier pathways.....	11
4.6. Strengthening pest outbreak alert and response systems.....	12
4.7. Assessment and management of climate change impacts on plant health	13
4.8. Global phytosanitary research coordination.....	14
5. Integration and Support.....	15
5.1. IPPC Communication Strategy	15
5.2. IPPC Partnership Strategy	16
6. International Year of Plant Health	17
7. Any Other Business	17
7.1. Review of the SPG role.....	17
7.2. Update on IPPC community activities in response to the COVID-19 pandemic	18
7.3. IPPC Secretariat positioning within FAO	18
8. Next Meeting	19
9. Close of the Meeting.....	19

APPENDICES

Appendix 01 - Provisional Agenda.....	20
Appendix 02 - Documents List	21
Appendix 03 - Participants List	22
Appendix 04 – Action List.....	30

The designations employed and the presentation of material in this information product do not imply the expression of any opinion whatsoever on the part of the Food and Agriculture Organization of the United Nations (FAO) concerning the legal or development status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The mention of specific companies or products of manufacturers, whether or not these have been patented, does not imply that these have been endorsed or recommended by FAO in preference to others of a similar nature that are not mentioned.

The views expressed in this information product are those of the author(s) and do not necessarily reflect the views or policies of FAO.

1. Opening of the Meeting

- [1] Mr Lucien KOUAME KONAN, Chairperson of the Strategic Planning Group (SPG), welcomed all participants to the SPG ninth session and gave the floor to Mr Jingyuan XIA, former IPPC Secretary and newly appointed Director of the Plant Production and Protection Division (NSP).
- [2] Mr Jingyuan XIA deliver his remarks, thanking the IPPC community for the outstanding work delivered during the past five years. He recalled the first SPG meeting he attended in 2015, during which the suggestion for annual themes to promote the IPPC work was first launched. Mr XIA listed the several successes that led to today stronger IPPC community and Secretariat, with over thirty staff members. The newly appointed NSP director encouraged all SPG participants to provide meaningful contributions during the current session as many IPPC successes started during such sessions. He mentioned the International year of Plant Health (IYPH) and its legacy, such as the International Day of Plant Health (IDPH) that was endorsed by the Committee on Agriculture (COAG) of FAO one week before the current SPG meeting.
- [3] Mr XIA concluded by underlining how the SPG is the think tank of the IPPC, constantly innovating for the future, and noted that the IPPC community is at a crucial crossroads with the challenge of implementing the IPPC Strategic Framework 2020 – 2030 and its development agenda during the next ten years. He underlined the importance of a clear and strong communication strategy, encouraging the SPG participants to continue organising events on plant health and the importance of IPPC work at the global level.

2. Meeting Arrangements

2.1. Adoption of the Agenda

- [4] The Chairperson introduced the agenda, asking for any editions or additions. The United States of America proposed two additional agenda items for discussion:
- update of the SPG terms of reference, to be added under Any Other Business; and
 - roundtable discussion on SPG agenda items and to summarise main strategic points from the meeting for consideration of the Commission on Phytosanitary Measures (CPM).
- [5] Mr Javier TRUJILLO ARRIAGA (CPM Chairperson) proposed the following additions to be discussed under Any Other Business:
- the role of the IPPC community in the process of appointment of the new IPPC Secretary and IPPC Secretariat positioning in the new FAO structure; and
 - update on IPPC community actions against COVID-19.
- [6] The SPG Chairperson noted no objections regarding the proposed additions and included them in the provisional Agenda, which was adopted and is attached to this report as Annex 1.

2.2. Election of the Rapporteur

[7] Mr KOUAME KONAN (SPG Chairperson) asked for volunteers to be nominated as Rapporteur at the current SPG session. Mr Javier TRUJILLO ARRIAGA (CPM Chairperson) proposed to nominate Mr Marco TRAA (Netherlands). The SPG Chairperson noted the proposal and Mr TRAA's acceptance of the role, which was seconded by Ms Marica GATT (CPM Bureau member for Europe).

[8] Mr Marco TRAA (Netherlands) was appointed Rapporteur at this meeting.

3. Administrative Matters

3.1. Document lists

[9] The Document list was introduced and is attached to this report as [Annex 2](#).

3.2. Participants list

[10] The Participant list was introduced and is attached to this report as [Annex 3](#).

4. Advancing work on IPPC Development Agendas 2020-2030

[11] Mr Peter THOMSON (CPM Bureau member for South West Pacific) expressed appreciation for the opportunity to present topics for the discussion on the IPPC development agenda items and summarised the main issues for the SPG discussion. He specified that the IPPC Strategic Framework 2020 – 2030 was approved but not yet endorsed by CPM, further specifying that it covers a ten-year period. He noted the importance to address all development agenda items strategically and that substantial work had already been carried out on three of the eight points.

[12] Mr THOMSON suggested a focused or staged implementation of the IPPC SF 2020 – 2030 as such an approach may allow to deliver better results. He invited the SPG to discuss whether the IPPC community and Secretariat may focus on the five development agenda items that the IPPC Secretariat has already commenced working on and delivered substantial work or implement all the development agenda items simultaneously.

[13] Mr Ralf LOPIAN (Finland) welcomed the paper from Mr THOMSON, adding that CPM guidance is also welcome when it comes to the IPPC SF 2020 – 2030 implementation. He noted that the IPPC Secretariat and community are developing an implementation plan for each agenda item with relevant milestones to be reached during the ten-year implementation period. He concluded by recommending an approach that may include all development agenda items implemented at the same time with detailed plans indicating major milestones to achieve within a precise timeline and with adequate allocated resources. Mr LOPIAN suggested these plans be drafted as soon as the next CPM adopts the IPPC SF 2020 – 2030 and also the establishment of small working groups for the drafting of such implementation plan.

- [14] Mr Osama EL-LISSY (United States of America) suggested to avoid simultaneous implementation due to resource constraints, deducing a strong need for priorities in the development agenda items to tackle. He also suggested that the SPG may provide a rank of priorities, suggesting assigning the highest priority to ePhyto, e-commerce and commodity standards. Mr EL-LISSY shared additional views on the current digital transformation of the economies also due to the current pandemic, inviting the SPG to reflect on the mid and long-term consequences of the ongoing transformations.
- [15] Mr Greg WOLFF (Canada) supported the approach proposed by the United States of America, stressing the importance of a clear implementation plan, which outlines expected strategies and resource usage in the near term as well as expected approaches over a ten-year span, including yearly implementation reviews.
- [16] Ms Olga LAVRANTJEVA (Chairperson of the Implementation and Capacity Development Committee) thanked Mr THOMSON for the paper, clarifying she agrees with setting priorities. Ms LAVRANTJEVA reminded the SPG that the Implementation and Capacity Development Committee (IC) has been providing inputs for the implementation priorities to the IPPC community on the SF 2020 – 2030, inviting the SPG to note the IC contributions.
- [17] The IPPC Secretariat supported the document presented, clarifying that a clear implementation plan is an extremely good tool to assess the available and missing resources as well as to define potential resource mobilisation strategies for all the development agenda items.
- [18] The SPG:
- (1) *Agreed* to establish a working group to propose a structured continuation of the discussion on the potential need to prioritise the IPPC Strategic Framework 2020 – 2030 development agenda items during the next SPG meeting.
 - (2) *Underlined* the importance of developing an implementation plan for all IPPC Strategic Framework 2020 – 2030 development agenda items containing clear milestones, a feasible timeline, a monitor and evaluation framework and adequate allocations in terms of budget and staff, which may be used for resource mobilisation purposes.

4.1. Commodity - and pathway - specific ISPMs

- [19] Mr Avetik NERSISYAN (IPPC Secretariat Officer-in-Charge) introduced the paper on Commodity and pathway Standard, indicating it is a new direction for the IPPC Secretariat but also community. He underlined how this tool may prove crucial in future IPPC communication, advocacy, partnerships and collaboration. He explained that the process is under way to develop the standard and that the IPPC Standards Committee (SC) already selected stewards.

- [20] The SPG entertained a discussion on the topic and agreed that the Commodity Standards represents an extremely positive innovation for the IPPC community, recognising the excellent work delivered by the Focus Group. Several SPG participants suggested to start with one commodity and draw from experience in certain regions, where this type of standards already exist, such as – but not limited to – the standard on mango in the Asia and Pacific Plant Protection Commission (APPPC), on which a regional workshop will focus on. New Zealand further specified that participation may be broadened to the entire IPPC community as the workshop is likely to happen through virtual means.
- [21] An SPG participant raised some concerns on paragraph 28 of the document concerning the definition and involvement of partnerships and networks for the commodity standards as this ISPM will still follow the standard setting procedure, which already regulates the participation by various stakeholders. Several SPG members agreed that the involvement of other stakeholders may be beneficial while noting that their participation must abide the IPPC text.
- [22] Mr Peter THOMSON (CPM Bureau member for South West Pacific) provided a brief overview of the paper drafted by New Zealand¹ on this topic, highlighting the general support for the IPPC community to proceed with the development of such standards while drawing from similar experiences in different regions. He commented that commodity standards have the potential to significantly benefit developing countries and facilitate trade among all IPPC contracting parties as well as reduce the resources required to conduct PRA and identify suitable phytosanitary measures for bilateral agreement, amongst other things.
- [23] The SPG:
- (3) *Agreed* to send the draft standard on commodities to the next CPM meeting for adoption.
 - (4) *Suggested* that the IPPC community adopt a cautious approach in developing the commodity standards and recommended to use existing and future experiences to move this process further, particularly from the regional initiatives or by selecting one commodity as a potential model for future reference.
 - (5) *Suggested* to focus the standard on commodities and not on pathways.

4.2. Developing guidance on the use of third-party entities

- [24] The IPPC Secretariat introduced the paper² summarizing the proposed and planned activities related to developing guidance on the use of third-party entities. He explained that the process is at the last stages to

¹ 10_SPG_2020_Oct

² 14_SPG_2020_Oct

develop the standard on the topic, and the CPM Bureau suggested to move forward and submitting it for adoption, notwithstanding that some contracting parties raised some concern. The IPPC Secretariat informed the SPG about the organization of a webinar on this topic, extending an invitation to all participants. Webinar (all invited) and desk study and guides will be developed once the standard is adopted.

[25] The SPG welcomed the discussion and focused its attention on the usefulness of the scoping study in the IPPC Implementation Review and Support System (IRSS). Several SPG participants presented cases in which this authorisation system is already present while noting how beneficial it can be for certain countries with limited capacity or constraints.

[26] Other SPG participants discussed the opportunity of scope for the IRSS study and raised some concerns regarding the role of such third-party entities, which may cause such as conflict of interest, testing confidence and capability as well as reliability in terms of equipment and sustainability of the relationship with such parties.

[27] The SPG agreed that the IPPC Secretariat may continue developing the necessary guiding material as well as seeking guidance from IPPC governing and subsidiary bodies on this matter to provide the IPPC community with the best evidence and support for countries that may wish to implement such a system.

[28] IPPC Secretariat thanked all SPG participants for their insightful inputs and provided clarifications regarding some of the aforementioned issues, also adding that SPG guidance is being sought as well while other answers may be provided by the IRSS study results, which will be published very soon. IPPC Secretariat also shared the information on the webinar, extending an invitation to SPG participants with the kind request to share it broadly in their respective networks, which is taking place on the 20 October 2020 12.00-14.00 (GMT+2 Rome time) and will be discussing the concept of authorization of entities to perform phytosanitary actions. The IPPC Secretariat further added that the Committee of the Sanitary and Phytosanitary (SPS) Agreement scheduled a similar webinar on 9 November 2020³, discussing voluntary third-party accreditation.

[29] The SPG:

- (6) *Acknowledged* the general support for the standard but also a strong request for additional information and discussion on this sensitive topic.

³ More information at <https://www.ippc.int/en/work-area-pages/workshops-and-experts-meeting/ippc-webinar-enhancing-the-understanding-of-the-concept-on-authorization-of-entities-to-perform-phytosanitary-actions>

- (7) *Welcomed* the initiative by the IPPC Secretariat to organise a webinar on third-party authorisation on the 20 October 2020 12.00-14.00 (CET).
- (8) *Thanked* the IPPC Secretariat for offering to share and present relevant information on this matter as it becomes available voluntarily.
- (9) *Agreed* that partnership and network is not to be included in the development agenda.

4.3. Diagnostic laboratory networking

- [30] The IPPC Secretariat introduced the paper⁴ summarising the proposed and planned activities related to developing guidance on the Diagnostic laboratory networking, explaining that the paper contained the ideas of the Technical Panel on Diagnostic Protocols (TPDP) and not to be regarded as a developed plan. She highlighted that the nature of the agenda item (developing an international network) requires some time to be established, despite recognising that this development agenda item may be considered a high priority but still requiring work as all the others. The IPPC Secretariat informed the SPG that the TPDP proposed a diagnostician workshop to be held but the current global sanitary crisis has not allowed it to take place just yet and she clarified that the presented budget come from the five-year investment plan, but there is no resource allocation at the moment, inviting the SPG to provide guidance on resource mobilisation.
- [31] The SPG noted that the needs for laboratory capacities vary greatly at the global level and suggested a step-by-step approach in identifying the requirements at the regional level before implementing a global initiative. Several SPG participants highlighted the need to list the country's requirements as a first step to begin planning the implementation of a diagnostic network while compiling a list of existing laboratories and their respective expertise, making use of the capillary spread of information technology and communication tools also as a result of the current COVID-19 pandemic, noting that this tool may be of high interest of national plant protection organizations (NPPOs). The SPG also agreed to apply a ten-year-span approach for this development agenda item and further suggested to add this item in the SC-IC collaboration framework.
- [32] The SPG:
- (10) *Agreed* to adopt a step-by-step approach in the implementation of the diagnostic laboratory networking.

⁴ 17_SPG_2020_Oct

- (11) *Welcomed* any initiative to share additional information that may support the better definition of the steps to follow in the implementation of the diagnostic laboratory networking.
- (12) *Suggested* the IPPC Secretariat to compile a list of existing laboratories and their respective expertise as well as the country primary requirements.
- (13) *Recognised* the importance of this initiative, which may provide great support to NPPOs in terms of expertise, equipment and capacity development.

4.4. Harmonization of electronic data exchange

- [33] The IPPC Secretariat introduced the paper on harmonization of electronic data exchange, noting that this has already been accomplished through the ePhyto platform. He suggested two main issues for SPG discussion, namely a technical conversation regarding potential enhancements and additional versioning (different technologies and/or mobile adaptation, amongst others), concluding that the main point would be SPG recommendations on financial sustainability options.
- [34] Mr Peter THOMSON (CPM Bureau member for South West Pacific) discussed the three main points for SPG discussion of the paper drafted by New Zealand on ePhyto, which referred to further implementing the ePhyto solution, suggestions for sustainable funding and governance of ePhyto platform.
- [35] The SPG welcomed the ePhyto initiative, which marked a key innovation for the entire IPPC community, and commended the IPPC Secretariat for its implementation, particularly Mr Craig FEDCHOK (ePhyto director). Several SPG participants noted that a discussion on the ePhyto governance is necessary and asked the IPPC Secretariat to coordinate the dialogue amongst all stakeholders, highlighting that the IPPC regular programme budget should not fund the ePhyto platform, the IPPC Secretariat and ePhyto governance should remain separate and that more commitment by countries may be necessary to ensure its sustainable funding.
- [36] The SPG discussed the opportunity to establish a small working group to analyse all said issues and that may also look into technical aspects related to both the ePhyto technological component as well as its stakeholders, such as the ePhyto Steering Group (ESG) and their potential involvement in both the working group and as donors to establish a sustainable funding mechanism.
- [37] The IPPC Secretariat suggested that interested parties reach out to the ePhyto Director to set up an informal Zoom discussion on how best to proceed with the approach to governance and other issues raised in the SPG discussion.
- [38] The SPG:

(14) *Commended* the work of the IPPC Secretariat for its implementation, particularly Mr Craig FEDCHOK (ePhyto director).

(15) *Suggested* the establishment of a small working group that includes also the ePhyto stakeholders to discuss the issue of expanding ePhyto applications both in terms of implementation and technical advancements, its governance and sustainable funding options.

4.5. Management of e-commerce and postal and courier pathways

[39] The IPPC Secretariat presented the paper which provided a brief history of IPPC activities related to e-Commerce, an update of on-going activities in the e-Commerce programme, and discussed possible future activities and budget considerations.

[40] The SPG stressed that e-Commerce has emerged as an important new pest pathway and is continuing to trend upwards during the pandemic, noting that distribution systems are changing to meet the demand of consumers and the challenge to screen and prevent the unauthorized entry of regulated goods, which could cause the spread of pests, continues to increase. He stressed the need to focus on e-Commerce and suggested the formation of a Task Force, modelled on the Sea Containers Task Force.

[41] Several SPG participants agreed that e-Commerce is an important issue that has been brought to the forefront by the pandemic and by the recent brushing scam, amongst other recent events. The IPPC Secretariat noted the close linkages with e-Phyto, particularly the emphasis on speed while helping to ensure safe trade, and suggested closer engagement between these two topics.

[42] The IPPC Secretariat reminded the SPG that the e-Commerce programme is under the oversight of the Implementation and Capacity Development Committee (IC). The IC Lead for e-Commerce noted that he was only recently appointed to work on e-Commerce and suggested that the establishment of a more formal group to support this work could be considered again when other activities have progressed further. The Secretariat encouraged interested participants to join the informal network of e-Commerce experts, in the meantime. The IC Chair suggested that the IC be asked to consider whether an IC-Team or an IC-Subgroup on e-Commerce would be most appropriate.

[43] Several SPG participants and the Chair of the Financial Committee (FC) noted the importance of reviewing the budget. One member noted that this review should help ensure that there are no financial barriers that would prevent developing countries from participating. The IPPC Secretariat noted that all NPPO are invited to identify a representative to participate in the informal e-Commerce network and to submit nominations to participate in the working group that will be tasked with developing the e-Commerce Guide and that both of these groups are expected to be virtual.

[44] The SPG:

(16) *Noted* the ongoing and proposed activities related to the e-Commerce programme.

(17) *Thanked* Canada for providing the necessary support to continue the work on e-Commerce

(18) *Recommended* that the Implementation and Capacity Development Committee consider the best approach to address the issues related to e-Commerce.

(19) *Requested* the IPPC Secretariat to review the e-Commerce programme budget in light of COVID-19 and the funding received, and recommended whether additional co-funding arrangements are needed.

4.6. Strengthening pest outbreak alert and response systems

[45] The IPPC Secretariat presented the paper providing a brief overview of IPPC activities related to emergencies situation, emerging pests and pest outbreak alert and response systems as well as an update of on-going activities of the dedicated programme.

[46] The SPG welcomed the approach taken by the IPPC Secretariat of learning lessons from systems in place, of building connections with FAO activities and with what regions and countries have set, considering the approach very encouraging and considered very appropriate to analyse existing tools and systems. The SPG advocated for the development of an accurate system whereby the IPPC Secretariat would find its place, emphasising the importance of the Focus Group providing guidance on this topic.

[47] The IPPC Secretariat clarified that the Terms of Reference (ToRs) of the CPM Focus Group for “Strengthening Pest Outbreak Alert and Response Systems” had been reviewed by the CPM Bureau and that a call was opened on the IPP until the 15th of November. The SPG noted that strengthening the overall phytosanitary capacities at the country level is necessary prior to act at the national or regional level, welcoming the future setting of the CPM Focus Group and considered which pests should be dealt with at the global level in the frame of this programme, and on how to divide functions in between FAO and the IPPC Secretariat, such as the case of *Spodoptera frugiperda* (Fall Armyworm).

[48] The SPG concluded that this programme encompasses two aspects: alert systems, recalling that existing systems exist within the Convention and on the IPP which require continued improvement, and response systems, which are complex and require synergies with other entities, expressing favourably on considering how to leverage other resources over long term and to identify the most efficient way to tackle this new work.

[49] The SPG:

(20) *Noted* the update and ongoing activities on the Development Agenda “Strengthening Pest Outbreak Alert and Response Systems”.

(21) *Congratulated* the IPPC Secretariat for the work delivered so far.

(22) *Urged* the IPPC Secretariat to finalise the establishment of the CPM Focus Group for “Strengthening Pest Outbreak Alert and Response Systems”

(23) *Asked* the IPPC Secretariat to liaise with relevant stakeholders to foster synergy on this matter.

4.7. Assessment and management of climate change impacts on plant health

[50] The IPPC Secretariat introduced the paper on climate change impacts on plant health, providing a background on the urgency of accelerating climate action in the United Nation System, specifying that climate change has a significant impact on plant health, especially through the possible expansion of pest distribution, incidence and intensity, and changes in pest epidemiology and life cycle, recalling the goal defined in the IPPC Strategic Framework 2020-2030 being that by 2030, the impacts of climate change on plant health and the safe trade of plants and plant products are evaluated on a regular basis, especially in relation to pest risk analysis and management issues, and that phytosanitary matters are adequately reflected in the international climate change debate and considered by the Intergovernmental Panel on Climate Change.

[51] The IPPC Secretariat invited the SPG to discuss and possibly agree on the major goal in 2021 is to increase the international understanding of the phytosanitary issues associated with climate change, follow up the Helsinki Conference with a webinar organized by the IPPC Secretariat, targeted at the CPM members, to further inform and enhance countries’ understanding of the issue and establish a CPM task force on climate change and phytosanitary issues.

[52] Several SPG participants welcomed the paper and suggested that the task force may continue building the mutual understanding about pest patterns and spread in relation to climate change through practical responses on this topic by NPPOs, noting that the current framework to move the discussion forward through the next CPM and the first International Plant Health Conference (IPHC) in Helsinki is appropriate. The SPG noted that the task force may be open-ended to allow broader participation on such an important topic.

[53] The SPG:

(24) *Thanked* the IPPC Secretariat for the work delivered so far and encouraged further definition of the following steps to take.

(25) *Asked* the CPM to establish a task force to further advance the work on climate change impact on plant health.

(26) *Asked* the IPPC Secretariat to make the necessary arrangements to hold a webinar following the outcomes at the IPHC in Helsinki.

(27) *Endorsed* the current concept note for presentation at CPM-15.

4.8. Global phytosanitary research coordination

[54] The IPPC Secretariat introduced the topic, highlighting that science has a crucial role in providing technical solutions, but also in bringing national and international actors closer together to work on forecasting, early warning, enhanced preparedness and implementing preventive measures and outbreak response to phytosanitary issue. The IPPC Secretariat further discussed IPPC's key activities is to develop and promote the implementation of internationally agreed, science-based standards in the regulation of plants and plant products as they move internationally and the main constraints towards its achievement.

[55] Mr Nico HORN (EPPO) thanked the IPPC Secretariat and discussed the benefits of the EUPHRESKO initiative, which shares experiences acquired through implementations, concluding that EPPO supports this IPPC SF 2020 – 2030 development agenda item on global phytosanitary coordination. He offered to share more insights on the EUPHRESKO initiative upon request and suggested to begin looking into existing networks to probe potential further integration at the global level.

[56] The SPG welcomed the proposal and highlighted the need to keep building on existing systems to avoid duplications and to minimise the risk of establishing a network without any uptake or participation by the IPPC community, considering this an occasion for younger researchers to start looking into plant health as a potential area of research.

[57] Several SPG participants raised several concerns regarding the specifications of such a global network in terms of infrastructure and resource allocation as well as noting the need to understand the root causes for lack of research on phytosanitary topics before taking any steps towards implementation.

[58] IPPC Secretariat agreed with the proposed approach to have an initial analysis and discuss with relevant organizations but also noted that the IPPC Secretariat is already collaborating with some research organizations and that a coordinator for research and academia is already present in the IPPC Secretariat, further recalling the in-kind contribution by USA to support efforts on this topic, amongst others.

[59] The SPG welcomed the clarifications by the IPPC Secretariat and discussed the potential establishment of a Phytosanitary Research Group while considering that the domain of phytosanitary research remains

extremely broad, suggesting some selection mechanism that takes into consideration national priorities should be established too.

[60] The SPG:

(28) *Welcomed* the initiative on Global phytosanitary research coordination

(29) *Thanked* the IPPC Secretariat for drafting the initial concept.

(30) *Suggested* to analyse the situation further by building on the existing experiences.

(31) *Clarified* that the phytosanitary research coordination should remain neutral and facilitate the research in accordance to national priorities.

5. Integration and Support

5.1. IPPC Communication Strategy

[61] Mr Greg WOLFF (Canada) introduced the topic, noting that every organization requires a communication strategy. He clarified that the proposal is to create a working group defining the ToRs of a Communication and Advocacy Group (CAG), highlighting the deliverables of the communication strategy, which should include the impact of COVID-19. Mr WOLFF specified that the CAG should be composed by IPPC staff and FAO Communication personnel, and experts from IPPC CP communication divisions, underlining the importance of continuity in the communication strategy.

[62] The SPG welcomed and supported the initiative, suggesting to build on existing experiences, such as the Communication plan for the International Year of Plant Health (IYPH), noting that this strategy may already take into consideration the initiative of establishing an International Day of Plant Health (IDPH).

[63] USA thanked the paper, which is fully supported. The Communication strategy must align with the IPPC SF, available communication tools and the establishment of the communication group. Should be done by next CPM. The team should be then assembled. Using inputs from the IYPH experience. lessons from IYPH in addition to future planning for IDPH could be included in this future TORs when and if a communication advisory group is formed.

[64] The SPG:

(32) *Endorsed* the development of an IPPC Communication strategy for the period 2021 – 2025 and *further endorsed* the proposal to discuss the establishment an IPPC Communication Advisory Group (CAG) at CPM-15.

(33) *Requested* the IPPC Secretariat to draft the initial Terms of Reference (ToRs) of the Working Group to be established at CPM-15 that will define tasks, scope and responsibilities for the IPPC Communication Advisory Group (CAG).

(34) *Invited* the SPG to make use, disseminate and share relevant experiences in supporting, promoting and drafting effective strategies for communication.

5.2. IPPC Partnership Strategy

[65] The IPPC Secretariat recalled that the convention text recognises the important role of partnerships and the IPPC SF 2020 – 2030 emphasises the importance to establish relevant partnerships. The IPPC Secretariat specified that the paper was reviewed by partnership division, and proposed the topic for SPG discussion and possibly endorsement to the next CPM meeting in 2021.

[66] The SPG raised several concerns regarding this initiative, mainly related to the definition of IPPC partners, their role, benefits and duties that such undertaking implies, amongst other considerations. The SPG noted the existing partnerships and collaboration, commending the IPPC Secretariat for the initial mapping of partnering and liaising entities, but also underlining the need for a more substantive approach that requires a more in-depth discussion by the IPPC community, in constant dialogue with the IPPC Secretariat, prior to reach the CPM.

[67] The SPG concluded that the discussion triggered by the IPPC Secretariat is a positive starting point and suggested to revise the paper adopting a more substantive approach, including potential levels of partnerships, mutual benefits and duties of engaging with the IPPC community to establish a partnership, the legal implications and the possibility of different levels of engagements, paying special attention to the potential political implications.

[68] The SPG:

(35) *Thanked* the IPPC Secretariat for the initial analysis of the IPPC partners and liaising organizations.

(36) *Suggested* to review the work on IPPC partnerships by the next SPG session, taking into consideration a more substantive approach, particularly on potential levels of partnerships, mutual benefits and duties of engaging with the IPPC community to establish a partnership, the legal implications and the possibility of different levels of engagements, paying special attention to the potential political implications.

6. International Year of Plant Health

[69] The IPPC Secretariat delivered an update on the IYPH activities throughout 2020, highlighting the high level of events, interactions and initiatives despite the pandemic. Several SPG participants shared their respective activities and initiatives related to the International Year of Plant Health, underlining the positive and encouraging feedback for such an important initiative, and welcomed the possibility to continue promoting plant health during the first semester of 2021.

[70] The SPG

(37) *Noted* the several positive experiences in organising IYPH events globally and *encouraged* SPG participants to continue promoting plant health during the first semester of 2021.

(38) *Commended* the IPPC Secretariat for delivering a successful International Year of Plant Health.

7. Any Other Business

7.1. Review of the SPG role

[71] Mr Osama EL-LISSY (United States of America) delivered a brief introduction to this newly included item on the SPG agenda, stating that the SPG plays a crucial role in facing the issues of the plant health community. He brought to the attention of the SPG that the IPPC SF 2020 – 2030 originated in the SPG. He summarised the proposal of reviewing the role of the SPG, which should be providing contributions and guidance to the IPPC community, without spending time on procedural matters.

[72] He suggested that future SPG agenda items should be submitted by CP, with a brief summary specifying the strategic relevance to the IPPC community, which would then be reviewed by the CPM Bureau. Mr EL-LISSY proposed the establishment of a working group composed of seven members, one per FAO region, to evaluate the primary SPG functions, identify new and emerging policy issues that could impact the IPPC community.

[73] The SPG welcomed the discussion but also noted that the recent SPG sessions have been entertaining a good number of strategically focused items, still expressing its availability to improve the quality of the discussions further.

[74] Several SPG participants suggested that it would be beneficial to review the SPG ToRs with the purpose of improving them. The SPG agreed to establish a group of volunteers composed by USA, Canada, New Zealand, IC Chairperson to draft a reviewed version of the SPG ToRs.

[75] The SPG:

(39) *Proposed* a revision of the ToRs of the Strategic Planning Group by the CPM with the purpose of improving them, if necessary.

(40) *Suggested* the establishment of a working group by the CPM Bureau for the revision of the SPG ToRs, highlighting the fact that the SPG discussions should continue remaining driven by its contracting parties.

(41) *Agreed* to establish a small group of volunteers to present a paper to discuss a potential revision of the SPG ToRs by the coming extraordinary session during the November meeting.

7.2. Update on IPPC community activities in response to the COVID-19 pandemic

[76] Mr Javier TRUJILLO ARRIAGA (CPM Chairperson) updated the SPG regarding the action the CPM Bureau took in response to the pandemic, mentioning that the FAO Legal Service was consulted but also the CPM Bureau asked for CPs' trust in taking the lead in absence of the CPM. He further specified that he had received only one reaction by a contracting party on this matter and that the IPPC community reacted positively to the CPM Bureau holding monthly sessions to provide continuity together with the IPPC Secretariat.

[77] The SPG:

(42) *Noted* the update by the CPM Chairperson.

7.3. IPPC Secretariat positioning within FAO

[78] Mr Javier TRUJILLO ARRIAGA (CPM Chairperson) summarised the current situation regarding the IPPC Secretariat positioning within the FAO structure. He clarified that the IPPC Secretariat may be placed in a reporting line linked to a Deputy Director-General of FAO and similar to the position that the CODEX Alimentarius Secretariat occupies now. Mr TRUJILLO ARRIAGA clarified that this discussion should take place at the coming session of the FAO Council.

[79] Several SPG participants noted that the current temporary positioning of the IPPC Secretariat does not reflect the best interests of the IPPC community and noted the possibility to join either the normative stream or become part of the One Health centre, which includes CODEX Alimentarius Secretariat and the International Treaty on Plant Genetic Resources as well.

[80] The SPG agreed that IPPC Secretary should be a D-1 position and that the CPM Chairperson may explore the opportunity and feasibility to entertain a face-to-face meeting with the Ms Beth BECHDOL, Deputy Director-General, to discuss the content of the letter Mr Javier TRUJILLO ARRIAGA sent on 18 September 2020 in person.

[81] The SPG recommended that the visibility of the IPPC within FAO should be improved and financially sustained.

[82] The SPG:

(43) *Endorsed* the CPM Bureau's position that IPPC Secretariat should have a visible position within FAO and placed in the normative stream or the one health stream, preferably the latter.

(44) *Agreed* with the CPM Bureau's position that the IPPC Secretary should be a D-1 position, reporting to a Deputy Director-General of FAO directly and that the CPM Bureau should be included in the selection process.

(45) *Asked* Mr Javier TRUJILLO ARRIAGA (CPM Chairperson) to arrange a meeting with the Ms Beth BECHDOL, FAO Deputy Director-General, to discuss the IPPC Secretariat positioning within the FAO structure as well as the CPM Bureau involvement in appointing the IPPC Secretary.

(46) *Recommended* to IPPC contracting parties to liaise with their counterparts in Rome to include the discussion on the IPPC Secretariat positioning in the next Council's agenda, under Any Other Business.

8. Next Meeting

[83] The next meeting will be on 10 November 2020, from 10:00 to 16:00 (CET).

9. Close of the Meeting

[84] The Chair thanked all participants for their active participation and closed the meeting.

Appendix 01 - Provisional Agenda

AGENDA ITEM		DOCUMENT NO.	PRESENTER / IPPC Secretariat support
1.	Opening of the Meeting		Jingyuan XIA (IPPC Secretary OiC) / Lucien KOUAME (CPM Vice-Chairperson)
2.	Meeting Arrangements		Lucien KOUAME
2.1	Adoption of the Agenda	01_SPG_2020_Oct	
2.2	Election of the Rapporteur	--	
3.	Administrative Matters		Arop DENG
3.1	Documents lists	02_SPG_2020_Oct	
3.2	Participants list	03_SPG_2020_Oct	
4.	Advancing work on IPPC Development Agendas 2020-2030	09_SPG_2020_Oct	Peter THOMSON
4.1	Commodity- and pathway- specific ISPMs	16_SPG_2020_Oct 10_SPG_2020_Oct	Avetik NERSISYAN / Adriana MOREIRA Peter THOMSON

Appendix 04 – Action List

N.	Action	Lead	Lead within Secretariat/CPM Bureau/ Persons involved	Deadline
1	Send the draft standard on commodities to the next CPM meeting for adoption	IPPC Secretariat	Avetik NERSISYAN	15/02/2021
2	Establish an small working group that includes also the ePhyto stakeholders to discuss the issue of expanding ePhyto applications both in terms of implementation and technical advancements, its governance and sustainable funding options	IPPC Secretariat	Craig FEDCHOK	29/01/2021
3	Hold a discussion on the best approach to address the issues related to e-Commerce and review the e-Commerce programme budget in light of COVID-19 and the funding received, and recommended whether additional co-funding arrangements are needed	IPPC Secretariat	IC Chairperson Brent LARSON	20/11/2020
4	Finalise the establishment of the CPM Focus Group for “Strengthening Pest Outbreak Alert and Response Systems”	IPPC Secretariat	Brent LARSON Sarah BRUNEL	29/11/2020
5	Liaise with relevant stakeholders to foster synergy on strengthening pest outbreak alert and response systems	IPPC Secretariat	Brent LARSON Arop DENG	15/12/2020
6	Establish a task force to further advance the work on climate change impact on plant health	CPM	CPM Chairperson	30/03/2021
7	Hold a webinar following the outcomes at the IPHC in Helsinki	IPPC Secretariat	Arop DENG Mirko MONTUORI	01/07/2021
8	Analyse the existing research coordination mechanisms to draft a proposal for global integration.	IPPC Secretariat	Arop DENG Mirko MONTUORI	16/02/2021
9	Develop an IPPC Communication strategy for the period 2021 – 2025	IPPC Secretariat	Arop DENG Mirko MONTUORI	16/02/2021
