INTERIM COMMISSION ON PHYTOSANITARY MEASURES

Seventh Session

Rome, 4 – 8 April 2005

Framework for Standards and Procedures of the ICPM

Agenda Item 7.5.2 of the Provisional Agenda

1. Each year the ICPM approves topics and priorities for standards to be included in the work programme of the IPPC Secretariat. This process is assisted by recommendations from the Informal Working Group on Strategic Planning and Technical Assistance (SPTA) that are considered by the Standards Committee (SC).
2. In developing recommendations for ICPM the SPTA and SC use information provided by NPPOs or RPPOs when submitting proposals for new standards, as well as guidance from the report of the fourth session of the ICPM (Appendix XIV of the report of ICPM-4) on criteria to be used when setting topics and priorities for standards. In considering new topics for standards the SPTA and the SC had available the framework document attached as Annex 1.
3. This framework document was drawn from an earlier document presented to the Committee of Experts on Phytosanitary Measures (CEPM- the first standards committee that operated before the establishment of the ICPM) in May 1994. The framework was updated and presented to the SPTA and SC to help them consider the topics and priorities for new standards.
4. The framework makes clear what has been achieved in the last ten years in terms of standard production, the areas of phytosanitary measures within which these standards are based, and also the areas where there has been little activity.
5. The framework is presented to ICPM members for the purpose of facilitating an understanding of which standards have been developed over the past ten years and to be used by ICPM members as a possible tool when considering topics and priorities for new standards.

For reasons of economy, this document is produced in a limited number of copies. Delegates and observers are kindly requested to bring it to the meetings and to refrain from asking for additional copies, unless strictly indispensable.
Most FAO meeting documents are available on Internet at www.fao.org

ICPM 2005 INF5 Annex 1 - Framework for Standards and Procedures of the Interim Commission on Phytosanitary Measures

Procedures and References	Pest Surveillance	Import Regulations	Compliance Procedures	Pest Management	Post-Entry Quarantine	Exotic Pest Response	Export Certification
	Survey & Monitoring	Regulation Construction	Phytosanitary Procedures associated with Points of Entry			Pest Eradication and Pest Control	Certification Systems
International Plant Protection Convention	ISPM 4: Requirements for the establishment of pest free areas	ISPM 2: Guidelines for pest risk analysis [<i>under revision</i>]	ISPM 13: Guidelines for the notification of non-compliance and emergency action	ISPM 15: Guidelines for regulating wood packaging material in international trade	Guidelines for post-entry quarantine (PEQ) facilities [<i>on work programme</i>]	ISPM 9: Guidelines for pest eradication programmes	ISPM 7: Export certification system
ISPM 1: Principles of plant quarantine as related to international trade [<i>under revision</i>]	ISPM 6: Guidelines for surveillance	ISPM 3: Code of conduct for the import and release of exotic biological control agents [<i>under revision</i>]	Guidelines for consignments in transit [<i>in consultation</i>]	ISPM 18: Guidelines for the use of irradiation as a phytosanitary measure			ISPM 12: Guidelines for phytosanitary certificates
ISPM 5 rev. 2002: Glossary of phytosanitary terms	ISPM 8: Determination of pest status in an area	ISPM 11 [2004]: Pest risk analysis for quarantine pests, including analysis of environmental risks and living modified organisms	Guidelines on sampling of consignments [<i>on work programme</i>]	The use of integrated measures in a systems approach for pest risk management of citrus fruit for citrus canker [<i>draft</i>]			Guidelines for inspection of consignments [<i>in consultation</i>]
ISPM 5 suppl. 1: Guidelines on the interpretation and application of the concept of official control for regulated pests	ISPM 10: Requirements for the establishment of pest free places of production and pest free production sites	ISPM 14: The use of integrated measures in a systems approach for pest risk management		Debarking of wood [<i>on work programme</i>]			Classification of commodities by phytosanitary risk related to level of processing and intended use [<i>on work programme</i>]
ISPM 5 suppl. 2: Guidelines on the understanding of potential economic importance and related terms including reference to environmental considerations	ISPM 17: Pest reporting	ISPM 16: Regulated non-quarantine pests: concept and application		Research protocols for phytosanitary measures [<i>on work programme</i>]			
Guidelines on the concept of equivalence of phytosanitary measures and its application international trade [<i>in consultation</i>]	Guidelines for surveillance for specific pests – citrus canker [<i>draft</i>]	ISPM 19: Guidelines on lists of regulated pests		Alternatives to methyl bromide [<i>on work programme</i>]			
IPPC Procedures: Rules & procedures for the ICPM	Requirements for the establishment, maintenance and verification of areas of low pest prevalence [<i>in consultation</i>]	ISPM 20: Guidelines for a phytosanitary import regulatory system	Guidelines for clearance of conveyances: - Clearance of aircraft etc - Examination of documents, stores, garbage etc	Guidelines for regulating potato micropropagation material and minitubers in international trade [<i>on work programme</i>]		Eradication procedures for specific pests: Citrus canker	Guidelines for training and accreditation of inspectors
IPPC Procedures: Procedures for dispute settlement	Technical panel to develop diagnostic protocols for specific pests	ISPM 21: Pest risk analysis for regulated non-quarantine pests	Notification and audit systems for cargo, baggage, mail: - Inspection methodology (see certification systems) - Guidelines for inspection re baggage, mail, passengers - Special inspection systems e.g. Preshipment import inspection (preclearance)	Technical panel on forest quarantine		Eradication procedures for specific pests: Fruit flies	Guidelines for sampling systems
ICPM Reports: Strategic planning work programme & calendar, budget	Technical panel on pest free areas and systems approaches for fruit flies		Non-compliance procedures: - Procedures for intercept identification - Pest treatment re non-compliance	Technical panel on treatments		Framework for control procedures	Specific inspection schedules for certain pests and/or for certain commodities
IPPC Procedures: Standard setting procedures					High-security PEQ	Control procedures for specific pests	
Phytosanitary capacity evaluation					Accreditation of pre-entry quarantine systems		
IPPC Procedures: Guidelines for formatting and drafting pest and commodity specific ISPMs					Lists of PEQ Techniques for: Determining the phytosanitary status of propagative material		
					Lists of PEQ techniques for: Treatment of infected material and re-treatment	KEY	
					Lists of PEQ techniques for: Production of plants in tissue culture and their inspection	Procedures and ISPMs: Adopted	
						ISPMs: In consultation with members	
						ISPMs: Being drafted or on work programme for development	
						Technical panels (first meetings late 2004 - early 2005)	
						Indications of what could be included in the activity areas.	
							Prepared by J. Hedley, July 2004. This framework is to indicate how many standards the ICPM has adopted or drafted and in which 'activity area' of ICPM standards and procedures. The 'activity areas' used in the framework are a personal choice. This document is not an approved ICPM document.
